

Healing the sick, proclaiming the kingdom of God.

Responding to Jesus' example of healing the sick and His call to spread the Gospel, CURE International champions the cause of children in the developing world whose physical disabilities can be corrected or alleviated through medical and surgical intervention. Our teaching hospitals and pediatric specialty programs currently operate in 29 nations, providing our spiritual ministry teams with unique windows of opportunity to pray, counsel, and share the love of God with the patients, families, and communities we serve.

Organizational Overview:

- CURE is the **largest provider of pediatric surgical care** in the developing world. Its hospitals and programs specialize in treating children with **correctable conditions** such as clubfoot, cleft lip and palate, hydrocephalus, and other physical disabilities.
- CURE was founded by **Dr. Scott and Mrs. Sally Harrison** in **1996** as a result of the **intense need for medical and spiritual care** they witnessed in their travels to underserved nations.
- CURE's current management team, led by CEO **Dale Brantner**, continues to implement the founders' vision of providing physical and spiritual healing by **growing CURE's network of hospitals and programs deeper** in each country served in order **to bear more fruit for the kingdom of God.**
- CURE hospitals and programs **will not turn away a patient due to gender, ethnic background, religious affiliation, or an inability to pay.**

**More than
2,100,000
patient visits**

**More than
150,000
surgeries**

**Over
130,000
expressions of faith**

**More than
6,600
medical professionals
trained**

Stewardship of Resources

Fiscal responsibility and accountability are critical aspects of CURE's financial stewardship model. Along with completing annual audits by a CPA firm, CURE is also a member in good standing with the ECFA.

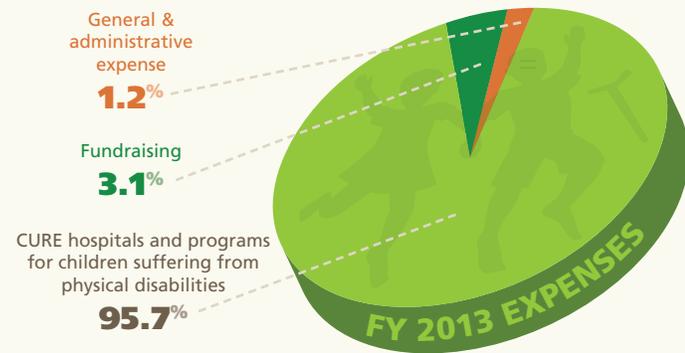

CURE's Functional Expenses	FY13 Unaudited	FY14 Budgeted
Program Expense	\$61,043,372	\$50,355,372
Administration	\$563,489	\$807,878

2,045 Life-saving surgeries

CUREkids (FY 2013)

6 Countries
12,295 Participants
\$505,786 Raised

CURE's DNA is made up of three interwoven pillars:

Physical Healing

CURE believes that curing a child's disability means removing a major obstacle from both the individual's and his or her family's life. Further, in the developing world, we believe that this reduction of obstacles contributes to poverty alleviation.

Medical Training

From the beginning, each CURE hospital has been physically and operationally designed to be a teaching hospital dedicated to training national medical practitioners. Trained staff then return to their communities where they provide exceptional medical care to their neighbors.

Spiritual Ministry

Often considered cursed, children suffering with physical disabilities, along with their families and communities, come to understand not only the medical reasons behind their children's physical conditions, but also the reality that God loves and values them, all through the work of CURE. They are all God's children.

Patient Stories

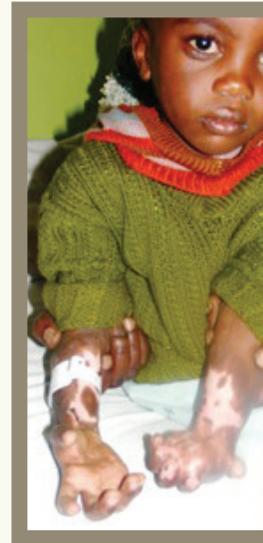

The following two stories are examples of lives that have been changed due to the care received at CURE. Each year, we hear thousands of stories just like Nelson's and Adbar's. To follow the stories of children CURE is currently healing throughout the world, visit: cure.org/curekids.

Nelson Kenya

Born in a remote village situated in the Kenyan countryside, Nelson has always been a happy child. His father works as a car washer, and his mother sells charcoal and chips.

One day, while Nelson was selling chips with his mother, he accidentally dipped his hands in the hot cooking oil. His mother rushed him to the local hospital where his burns were treated. For two months he stayed in the hospital, but eventually the money ran out. Nelson's treatment was discontinued, and his burn contractures worsened as he grew. After returning to the local hospital, Nelson and his mother were referred by doctors to CURE Kenya. There, he had surgery to release the contractures on his arms.

Through their mutual experience at CURE Kenya, Nelson and his mother have been changed forever. Nelson can now experience life without a disability, and his mom has a new understanding of God.

Adbar Ethiopia

Adbar is six years old. She lives with her family in a remote village approximately 700km from CURE Ethiopia. Early on in life, Adbar developed clubfoot and was in desperate need of corrective surgery.

As her condition worsened, Adbar's confidence weakened, her view of the world narrowed, and her opportunities were stifled. Thankfully, Adbar and her father were referred to CURE. After two full days of travel by bus, Adbar and her father made it to the hospital. There, she finally had the surgery that she so desperately needed.

After making a full recovery, Adbar will be able to walk without pain, play with her friends, and experience a world full of new and exciting opportunities.
