Dear friend,

What incredible blessings we have seen this year! Every child entering one of our hospitals or clinics reminds us that God works miracles through CURE International — by His grace, through your support.

As more and more children come to CURE seeking treatment, faithful friends like you have stepped up to meet the growing need. Generous supporters helped move a number of projects forward this past year:

- We built a new guesthouse in Niger, increasing our capacity to treat patients needing long-term care.
- In Zambia, a new training center will facilitate continuing education programs for our staff and for medical professionals from all over the country.
- We have several projects underway in Ethiopia, Kenya, and the Philippines, all of which will help us serve more children.
- And more!

Physical healing is just a part of our story, though. Spiritual ministry is integrated into everything we do. This year alone, more than 11,000 people made an expression of faith as a result of the gospel being shared through CURE. For this, we thank God.

Yet God uses you to set it all in motion. As you review CURE's achievements in the following pages, you can join us in celebrating — knowing that none of this could have happened without the prayers and financial support of people like you, engaging in CURE's mission to heal the sick and proclaim the kingdom of God. Thank you for standing with us!

Sincerely,

Dr. Roger Spoelman
President & CEO
Our Mission

Healing the sick and proclaiming the kingdom of God

As Jesus carried out His earthly ministry, He sent His disciples to continue the work and to carry it even further to the towns and villages in Judea. “He sent them out to proclaim the kingdom of God and to heal the sick,” says Luke 9:2 NIV.

Jesus didn’t confine Himself to preaching about God’s kingdom. He also demonstrated the values of God’s kingdom by restoring broken individuals through healing. So when He sent the disciples, He didn’t send them with one job; He sent them with two: Proclaim the kingdom. Heal the sick.

As disciples of Jesus in the 21st century, we’re dedicated to pursuing this same mission. CURE is committed to healing and proclaiming — together, as one ministry. Everywhere CURE goes, we carry the good news with us, and we put the values of the kingdom of God into practice. The result: healing for the whole person — emotional, spiritual, and physical. Why? Because whenever God is invited in, healing happens!

Every business day in 2018, the CURE network witnessed an average of:

- 62 procedures performed in our hospitals
- 66 children enrolled in clubfoot treatment
- 19 procedures performed by surgeons trained by CURE to heal children suffering from hydrocephalus and spina bifida
- 43 people making an expression of faith in Jesus Christ
- and 2 volunteers mobilized to serve around the world
Meet Doreen

a 14-year-old girl from Malawi

“OH, THE CRIPPLE! GO THROW HER INTO THE BUSH!”

That’s what Doreen heard when she ventured into the village. Her bowed legs made walking difficult and painful, so much so that she sometimes missed school. Then there was the emotional pain she endured from people staring at her, talking about her, ridiculing her.

Fortunately, her loving family found out about CURE Malawi and brought her to our hospital for treatment.

What happened next? Find out now at cure.org/doreen
How we do it:

Hospitals

PEOPLE CALL THEM HOSPITALS — CURE operates them in nine countries — but they could just as easily be called embassies for God’s kingdom.

We focus on pediatric orthopedic surgery and pediatric neurosurgery. Here, your support of CURE connects with children who otherwise would have no access to care. We offer them treatment in a setting where they are accepted and loved. In fact, at CURE, many encounter a welcoming embrace for the very first time in their lives.

CURE hospitals are also places of learning. Surgical residents get hands-on training. Nurses, technicians, and other medical professionals stay on top of the latest standards in care. And local pastors learn how to transform a culture that dismisses those with disabilities.

These embassies for God’s kingdom are also launching pads for outreach missions: From our hospitals, we send teams out to remote locations to build community partnerships, identify new patients for surgery, follow-up with existing patients, and share the gospel with those we meet.

MORE THAN 196,000 PROCEDURES PERFORMED SINCE 1998.

90% OF THE POOREST THIRD OF HUMANITY LACK ACCESS TO BASIC SURGICAL CARE. WE’RE OUT TO CHANGE THAT.

CURE HOSPITALS 2018

287,370 PATIENT VISITS
16,240 PROCEDURES
MORE THAN 79,000 PEOPLE REACHED WITH THE GOSPEL
230 MOBILE CLINICS CARRIED OUT TO CLOSE THE GAP IN ACCESSING CARE FOR OUR PATIENTS
588 VOLUNTEERS MOBILIZED
Meet Janet

*CURE Malawi’s first physiotherapist*

WITH 15 YEARS OF EXPERIENCE at CURE Malawi, Janet has seen firsthand the importance of training.

“When you look at CURE, we work more as a team than other hospitals. We talk to the doctors and to the Spiritual Team; everyone takes a part. I’ve worked with different people from different professions, and all of them have had an impact on my life because I was able to learn from them. Coming here has challenged me. It has helped me to say, ‘I can’t stay on this level; I need to learn more.’ That’s what’s kept me going back to school. It has helped me to grow academically. It inspired me to look ahead.”

Where we work

Our nine hospitals and 411 partner treatment locations gave us the opportunity to serve in 27 countries in 2018.
364 learners
ETHIOPIA
Throughout 2018, the hospital hosted 364 medical students, fellows, and residents, training the next generation of Ethiopian doctors.

6 suction machines
MALAWI
Donated by Toyota of Malawi, this essential equipment helps to clear out wounds during operations.

2 guest houses
NIGER
A second guest house was completed at our Niamey Hospital, allowing us to host more patients who need long-term treatment.

4 exam rooms
KENYA
The new outpatient department in Kenya has larger, better-equipped exam rooms that help us see more patients.

1,323 procedures
UGANDA
The 1,323 surgical procedures performed in 2018 set a new record for the hospital.

469 admissions
UNITED ARAB EMIRATES
We admitted 469 tiny patients to the NICU (neonatal intensive care unit) at Oasis Hospital in 2018. The NICU provides care for newborns who need specialized treatment because they were born prematurely or experienced complications during birth.

4 exam rooms
KENYA
The new outpatient department in Kenya has larger, better-equipped exam rooms that help us see more patients.

3 floors
THE PHILIPPINES
The Tebow Cure Hospital began work on the unfinished 3rd floor, which will increase our capacity for patient care.

13 clinics
GHANA
Cure Clubfoot clinics in hospitals throughout Ghana provide treatment for clubfoot, one of the most common musculoskeletal birth defects.

407 trainees
ZAMBIA
Thanks in part to a newly dedicated space for training at the hospital, 407 people participated in 17 different training events.

2 guest houses
NIGER
A second guest house was completed at our Niamey Hospital, allowing us to host more patients who need long-term treatment.

407 trainees
ZAMBIA
Thanks in part to a newly dedicated space for training at the hospital, 407 people participated in 17 different training events.

10 years
BANGLADESH
This year, Cure Hydrocephalus and Spina Bifida celebrated 10 years of healing in Bangladesh.
How we do it:

**CURE Hydrocephalus & Spina Bifida**

**Children with Hydrocephalus** are at great risk. Left untreated, many will not live to see their second birthday. Though hydrocephalus has a variety of causes, the condition often accompanies spina bifida, a birth defect that also presents great risk. Sadly, there are too few, if any, neurosurgeons in many countries that have the highest prevalence of these devastating conditions. Access to care isn’t the only problem. The international medical community’s primary choice for treatment uses dated technology that has a high rate of failure, a problem only made worse by the lack of access to neurosurgical care in the developing world.

Our CURE Hydrocephalus & Spina Bifida (CHSB) program tackles this problem head on. Neurosurgeons from around the world are trained at CURE Uganda in the most advanced procedures to treat these conditions, including the innovative ETV/CPC procedure, which was pioneered by our surgeons. When successful, ETV/CPC significantly reduces both the rate and severity of failure.

Along with training surgeons, we help establish partner treatment locations (PTLs) at their hospitals. These PTLs offer counseling services for patients and their families, long-term follow-up, and clinical support.

---

**CHSB 2018**

- 3,589 procedures at partner treatment locations
- 2 surgeons trained in the comprehensive treatment of hydrocephalus & spina bifida
- 16 partner treatment locations in 12 countries

Since 2011, surgeons **trained by CURE** have performed more than 12,000 procedures to treat hydrocephalus and spina bifida.

**Neurosurgeons in the US:** 1 for every 88,000 people

**Neurosurgeons in East Africa:** 1 for every 10,000,000 people
Hope for Indonesia
A new trainee for CHSB expands access to ETV/CPC in the islands of southeast Asia

"IN MY HOMETOWN, neurosurgery doesn’t happen often," says Dr. Mousa of the Indonesian city he and 7 million other people call home.

Encouraged by his parents to pursue medicine, Dr. Mousa chose to become a neurosurgeon. He was not content with his skill set, though, and sought ways to develop his expertise in pediatric neurosurgery. A chance web search introduced him to CHSB, and he applied for the neurosurgical fellowship at CURE Uganda.

“I want to be better,” Dr. Mousa insists. “I want to do better treatment for my community. Doing ETV means a much better prognosis for the children in my country.”

Read more of his inspiring story at cure.org/mousa
WHAT HAPPENS WHEN YOU DONATE $1 TO CURE?

1. In 2018, CURE paired every donated US dollar with 33¢ from international partners, local governments, and in-country donations and revenues.

2. Of that $1.33, we spent 83.5% ($1.11) on program costs — all the costs that directly provided care for the children and families in CURE hospitals and specialty programs. That is everything from medical equipment and essential supplies to salaries for more than 2,000 staff.

3. Of the remaining funds, we spent 5% (7¢) on administration — things that provided necessary support to our hospitals, like recruiting and strategic planning. This helped us remain transparent and accountable, through timely reporting and good governance.

4. We spent the final 11.5% (15¢) on fundraising — telling more people about CURE and encouraging them to join us in this incredible calling to heal the sick and proclaim the kingdom of God.

THE BOTTOM LINE: YOUR INVESTMENT IN CURE, COMBINED WITH FUNDING FROM AROUND THE WORLD, IS CHANGING LIVES EVERY DAY, FOR TODAY AND FOR ETERNITY.

PRACTICING FISCAL RESPONSIBILITY and accountability are critical aspects of CURE’s stewardship model. An independent CPA firm audits us annually, and we are in good standing with several organizations that review charities, including GuideStar, Charity Navigator, and the ECFA. Find more resources and state fundraising disclosure statements at cure.org/finance.

The numbers and statistics cited throughout this report reflect CURE’s Fiscal Year 2018, which ran from July 1, 2017 to June 30, 2018.
How we do it:

CURE Clubfoot

CLUBFOOT IS ONE OF THE MOST COMMON BIRTH DEFECTS in the world. Our hospitals regularly see children born with clubfoot who have never received treatment. By the time they’re brought to a CURE hospital, the best solution is usually surgery — effective, but painful and costly. They could have avoided surgery by going through an inexpensive casting and bracing process soon after birth, giving them straight feet by the time they were ready to walk.

Correcting clubfoot early is the idea behind CURE Clubfoot, a program we launched in 2006. In the past 12 years, CURE Clubfoot has grown to be one of the largest providers of clubfoot treatment programs worldwide. In 2018, we operated the program in 17 countries, working toward an ambitious goal: eradicating clubfoot as a lifetime disability by correcting the condition early. We also provide important follow-up care, ensuring that clubfoot does not become a permanent disability or require complex surgery in the future.

OF THE 200,000 children BORN WITH CLUBFOOT EVERY YEAR, 4 OUT OF 5 — a total of 160,000 — ARE ON TRACK TO REMAIN PERMANENTLY DISABLED, DESPITE THE EXISTENCE OF INEXPENSIVE TREATMENT THAT CAN CORRECT THE CONDITION FOR LIFE. WE’RE WORKING HARD TO CHANGE THIS SAD STATISTIC.

SINCE 2006, MORE THAN 119,000 CHILDREN HAVE BEEN TREATED AT OUR PARTNER CLUBFOOT CLINICS —

CURE CLUBFOOT 2018
17,363 CHILDREN NEWLY ENROLLED IN TREATMENT
215,265 CLINIC VISITS BY ENROLLED CHILDREN
14,840 CHILDREN ACHIEVED CORRECTION AND RECEIVED THEIR FIRST BRACE
Introducing Hope Walks

Advancing the fight to eliminate clubfoot as a lifelong disability

HOPE WALKS! That’s the new name for CURE Clubfoot. The program will become its own independent non-profit organization in 2019. The current leadership, partnerships, and worldwide co-workers within the clubfoot program will remain in place, continuing their leading role in the global clubfoot effort.

Recognizing the urgent need for infant clubfoot treatment, CURE International is enthusiastically supportive of the mission behind Hope Walks: Motivated by our hope in Christ, Hope Walks frees children, families, and communities from the burden of clubfoot.

How we do it:

Integral Ministry

WHEREVER CURE GOES, the kingdom of God is proclaimed. That’s part of our mission, and we hold fast to it. For us, ministry means more than simply having a chaplain somewhere on the premises. Ministry is what each and every CURE co-worker does. Our core values are kingdom values. Our approach to patient and family care is centered on seeing people through God’s eyes, with the dignity inherent in dearly loved creations of the heavenly King.

By integrating ministry into every aspect of what we do, we have been blessed to bear witness to God bringing healing — physical and spiritual — to people around the world. The broken are restored, the lost are found, and through it all, we give thanks to God.

SINCE 1998, OUR SPIRITUAL MINISTRY TEAMS ACROSS ALL PROGRAMS AND LOCATIONS HAVE WITNESSED MORE THAN 184,000 EXPRESSIONS OF FAITH IN JESUS CHRIST.

SPIRITUAL MINISTRY 2018
MORE THAN 86,000 PEOPLE REACHED WITH THE GOSPEL
MORE THAN 11,000 FAITH EXPRESSIONS
“What I know is Jesus is here.”

One mother’s journey to faith and healing

Winnie came to CURE Uganda with her daughter (also named Winnie) and without much else. Estranged from her family and abandoned by the child’s father, Winnie’s heart needed healing just as much as her daughter needed medical care.

At CURE, Winnie found love and acceptance. She also learned something: “I never knew that I could have a personal relationship with God,” she says, “but now I believe.” With her newfound faith and discipleship from CURE’s spiritual ministry team, Winnie also learned to forgive others; in this way, she found restoration in her relationship with her parents.

Baby Winnie found healing, too!

See more of their incredible story at cure.org/winnie.
You can answer the call.

Jesus’ directive to proclaim the kingdom and heal the sick is for you.

Will you step out in faith and join Him?

We welcome the opportunity to partner with you to help transform lives. Your gifts of time, talent, and treasure can make a difference for children with correctable disabilities and for the kingdom of God.

- Pray with us for children and families who need healing: visit cure.org/pray
- Volunteer or serve with us at a CURE hospital: visit cure.org/go
- Give today. The cost to complete the funding for a child’s surgery is just $1,000: visit cure.org/donate
