Established in 2008, CURE Ethiopia performs over 3,000 life-changing reconstructive and orthopedic surgeries every year for children suffering from treatable disabilities. Strategically located in the capital city of Addis Ababa, the teaching hospital has 70 beds and four operating rooms. CURE International uses this facility to multiply its efforts by partnering with The College of Surgeons of East, Central, and Southern Africa (COSECSA) to serve as a regional learning institution by implementing an orthopedic pediatric training program at the residency and fellowship levels. In addition to world-class clinical service, CURE Ethiopia ministers to the emotional and spiritual needs of patients and their communities.
